

### Understanding the Spacing Method

The recommended spacing for each bucket is determined by a staggered layout. Buckets in a single row are spaced 3 ft on center and buckets across from each other are spaced apart 18 in on center.

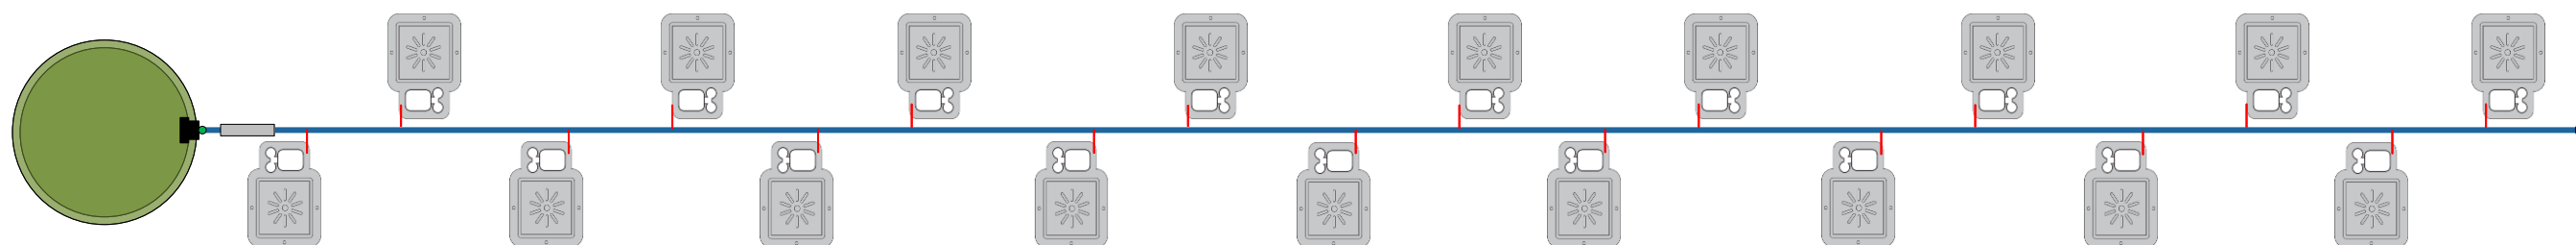

6 Bucket Package

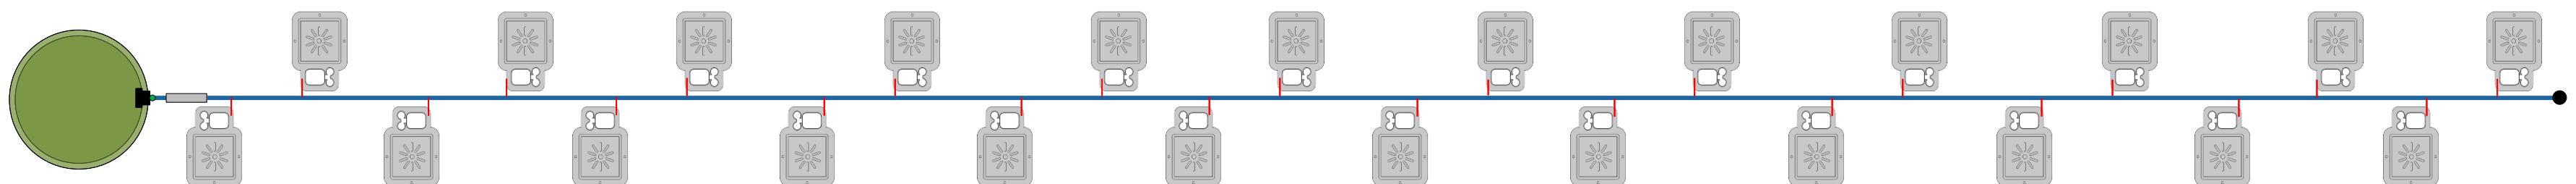

12 Bucket Package

18 Bucket Package

24 Bucket Package

AutoPot Buckets			
Number of Buckets	System Length	Tomatoes in lbs	Bell Peppers in lbs
6	11 ft	540	30
12	19.4 ft	1080	60
18	28 ft	1620	90
24	36.10 ft	2160	120

- Tomato production is based upon 2 tomato plants per bucket with an average annual harvest yield of 45lbs per plant.
- Bell pepper production is based upon one plant per bucket with an average annual harvest yield of 5lbs per plant.
